

Katy Independent School District
**Request for Video Surveillance Equipment in a Special
 Education Self-Contained Setting**

In accordance with Senate Bill 507, on request by a parent, trustee, or staff member, a school district or open-enrollment charter school must provide video equipment on campuses in accordance with *Texas Education Code (TEC) 29.022*. Campuses that receive video surveillance must place, operate, and maintain the video and audio equipment in self-contained classrooms or other special education settings in accordance with TEC 29.022.

In order to promote the safety of students receiving special education services in certain self-contained classrooms and other special education settings, Katy ISD will place video surveillance with audio capability in one of the above settings upon receipt of this form by a parent, trustee or staff member. A request for video surveillance is applicable only to the school year in which it is requested. The video surveillance equipment will be operated during the school year as long as the self-contained classroom meets the requirements of TEC 29.022. Parents may only request equipment to be installed in an appropriate classroom in which they have a student. If a student for whom the video surveillance equipment was requested is no longer in regular attendance in the classroom, video recording will be stopped, unless there has been a separate request for video surveillance on behalf of another student who remains in the classroom. If the Staff Member who requested the video surveillance no longer provides services in the classroom, video recording will be stopped unless a separate request for video surveillance monitoring is in effect. Requests regarding video surveillance monitoring during extended school year services must be submitted separately.
